HL4200 In-wall double trap for washing machine and dryer

The new HL4200 „All in one“ in-wall trap for both washing machine and dryer including the completion set.

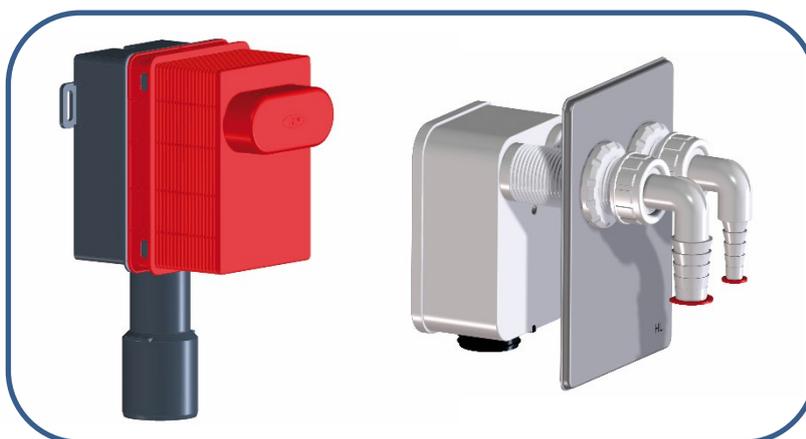

Bild verpackt

For the HL4000 the corpus HL4000.0 and the completion set HL4000.2 have to be ordered separately. With the HL4200 the main corpus and the completion set are packaged together.

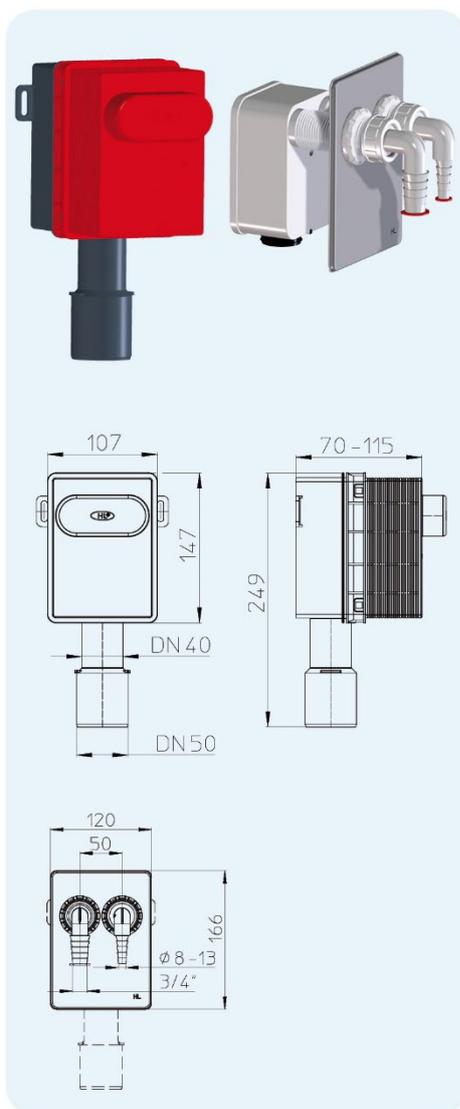

Differences between HL4200 and HL4000.0 + HL4000.2 in detail:

- The framing set is delivered without the red odor assurance (plug)
- The siphon cartridge does not include the ball for backflow prevention
- HL4200 is specifically for usage of a washing machine + dryer and is therefore only delivered with one HI19 (for the washing machine) and one HL19.2 (for the dryer)

HL4200 In-wall double trap for washing machine and dryer
